MarineVAP

Bilge Water - Grey Water - Treated Black Water NO DISCHARGE IS A GOOD DISCHARGE

SkimOil's MarineVAP (MV) system is an electric powered evaporator system that safely and automatically turns waste water to vapor and evaporates it away to atmosphere.

The MarineVAP can be the final chapter for your on-board waste water management. With only one moving part, this simple MarineVAP system can evaporate many on-board waste water streams without operator intervention or maintenance requirements, other than to drain some concentrate after several tanks full have already been evaporated away.

With simple controls and full monitoring capabilities the MarineVAP can turn your boat or vessel into it's own "NO DISCHARGE ZONE"

It doesn't get any easier or safer than ZERO LIQUID DISCHARGE (ZLD)

How and why the MarineVAP improves on-board water evaporation:

Simply get your water into the stainless steel tank, and turn on the power switch. It operates unattended until it runs out of water or would get a big slug of oil or junk.....at which point it will shut down automatically and give you signals that it's ready for more water or attention.

With a high and low level cut-off switches, dual safety shutoffs, and dual thermostats for overheating protection, the well insulated stainless steel tank conserves energy and provides a safe physical environment. The sight glass lets you monitor what's going on and two drain valves provide for partial or total draining of the unit if and/or when oil, soaps or solids accumulate. The drain process can be field automated by others.

It doesn't get any easier or safer than ZERO LIQUID DISCHARGE (ZLD)

Available in 7 sizes the MarineVAP can evaporate up to 25 gallons per hour.

NO DISCHARGE IS A GOOD DISCHARGE

Dual Safety Shutoff's

Industrial and Marine Solutions Since 1995

The MarineVAP is the natural and logical successor to our very successful original, extremely simple, rugged and efficient BilgeVAP bilge water evaporator introduced in 2001. SkimOil's marine electric evaporator technology is mature and well proven. The MarineVAP simply offers far greater control and monitoring capabilities for the whole evaporation process. These units are ISO:1401 Compliant.

MarineVAP™ Marine Waste Water Evaporator

Model No.	Capacity Lbs/HrGals/Hr		KW	Amps	Volts	Shipping Wt	Phases	Dimensions H x L x W
